5 Minute standup comedy assessment

Prompt strategies used:

- **One shot prompting:-**

   I provided an example of a stand-up comedy script as a reference and asked the model to generate a similar set. This gave a full structure with school-themed humor.

- **Iterative prompting:-**

   I refined the output using follow-up prompts to make it suitable for a specific age group (Class 5 to 10), to keep it under 5 minutes, and to present it as a conversation between the performer and students.
